

How to say *"no, thank you"* when offered a straw

B I N G O

CHOOSE TO REFUSE THE PLASTIC STRAW!

CHOOSE TO REFUSE THE PLASTIC STRAW!

I brought my own straw!

Save the straw from a needless end!

"N" to the "O" on the straw.

I'm learning my limits and straws cross the line.

I'm highly sensitive to the idea of a straw.

No need for a straw, please!

We don't need anything extra.

Straws are not a priority for me now.

The powers that be tell me to pass on the straw.

I just can't suck today.

I have a strict "no straws" policy.

I'd prefer a drink without a straw.

FREE SPACE

Regrettably, my conscious does not let me use a straw.

Trying to cut down on the straw consumption.

I'll sit out on the straw.

It would make my heart happy if my drink didn't have a straw.

I'll be great without a straw.

Rethinking how I do things today.

On a scale of maybe to absolutely, absolutely do not bring me a straw.

Thank you, but no thank you.

My instincts have reminded me that a straw is not necessary.

We'd appreciate the extra space.

I don't need a straw.

I do not have room in my life for straws now.

"hold the straw, please!"

The U.S. uses enough straws to wrap around the world 2.5 times every day

Each day people use almost 500,000 a day

Straws are used for minutes but are here for centuries piling up daily.
